

## Bullet Points: -

- Develop and maintain web applications using front-end and back-end technologies.
- Collaborate with cross-functional teams to gather requirements and design innovative solutions.
- Write clean, efficient, and scalable code for both client-side and server-side applications.
- Implement and maintain database systems and optimize performance.
- Ensure the responsiveness and usability of applications across multiple devices and platforms.
- Conduct thorough testing and debugging to identify and resolve issues.
- Stay updated with the latest industry trends and technologies to drive continuous improvement.
- Provide technical guidance and mentorship to junior developers.
- Participate in code reviews to ensure adherence to coding standards and best practices.
- Collaborate with stakeholders to define project scope, objectives, and timelines.
- Contribute to the overall architecture and design of web applications.
- Troubleshoot and resolve production issues in a timely manner.
- Document technical specifications and system documentation.
- Minimum of 5 years of professional experience as a Full Stack Web Developer.
